FARM AND ARM

Do your "bit."

If you don't go to fight—raise crops; if working in the city, get some land to cultivate, this year and next, for the War may be a long one.

What You Can Do on a Little Land

is shown by the letter below.

This man did it, so can you. Crops at 5 cents a square foot, by very intensive cultivation, mean no less than \$2,178 an acre. If you can't do as well as this—do your duty—the best you can.

READ MR. VINES'S LETTER

Annapolis, S.L.

Hearing so much about the high cost of living, I advise people to plant their own vegetables. I have only a small plot of land which I plant, size being 40 by 200 feet. The produce is wonderful. I sell to a few friends, and even then I have vegetables to spare. Every square foot supplies me with at least 5 cents' worth of vegetables, without any extra effort. This saves the cost of living more than \$100 per year.

I honestly think it is worth investing in a plot of land, as it is not only profitable but it is the root of health, as I have never known any one getting sick working on the land. Often sick people go and work on the land and recover, as it is the healthiest occupation in the world. Yours truly, JOHN E. VINES.

On Brooklyn's southern slope was ever its best truck garden land—a soil rich and fertile—fine for gardens, better for homes and best for investment—for the Interboro is now building its subway down Nostrand Avenue. The work is nearly completed and in a year's time you can ride to any part of the Interboro's great Subway System for a 5-cent fare.

Best of all is the price. To settle the estate of our former partner, Mr. Chas. E. Wood, we are selling lots at literally half value. You can plant the day you sign the contract, and your growing crops should go a long way toward paying for it.
